

Netplaces

Work more effectively with project teams and work groups anywhere in the world...

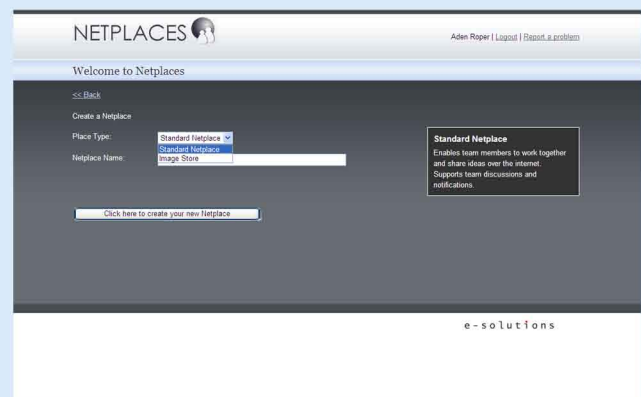

Netplaces is team collaboration software, it can be used to transform the way groups work together on projects and sharing everyday documents.

Netplaces supports teams inside and outside your company network, making it easy to use with customers, suppliers and partners.

Netplaces is easy-to-use, intuitive software that can provide you with the following benefits:

- Work more effectively with project teams and work groups, anywhere in the world.
- Eliminate or reduce duplication of efforts and content inconsistencies. Share, access and collaborate on team content that is the most up-to-date.
- Focus valuable resources on solving business problems, leveraging new ideas and reducing time to market.
- Empower teams to set up and manage their information and projects in a security-rich environment without requiring IT assistance.
- Provide an effective alternative to e-mail for storing and managing content — cut down on e-mail overload.

Creating a Netplace is easy for anyone to do, simply click the Create Netplace button, select your template and follow the steps.

Below is a Standard Netplace in action.

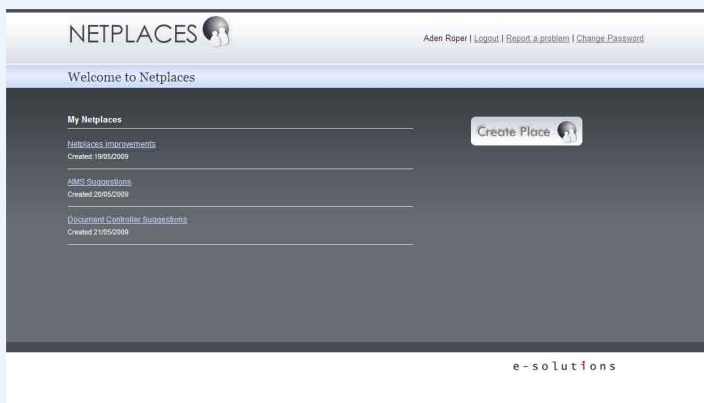

The user interface is delivered via Internet Explorer or any Mozilla based browser such as Firefox.
